

In-class Presentation (15 pts.)

Prepare a 15-to-20-minute presentation on one of the topics below, or a topic of your own choosing (to be cleared with the instructor no later than April 9).

You may use the instructor PC to project slides or images on the classroom screen during your presentation if you wish.

The presentations will be delivered in class on April 30. Please submit any supporting documents (lecture slides, handouts, notes, posters) in class after your presentation.

Your grade for this presentation will be based on:

- How well you researched and learned the topic and how well you understand it yourself.
- How well you present the topic and handle questions about it.

I am very happy to help you prepare the presentation and to point you to sources on the topic, so don't hesitate to ask for my help.

Suggested topics (only one student may present on any give topic)

1. Libraries and linked data/Libraries and the Semantic Web
2. BIBFRAME
3. FAST (Faceted Application of Subject Terminology)
4. The Virtual International Authority File (VIAF)
5. Metadata in institutional repositories
6. Discovery layers

LIS 606—Advanced Cataloging

Spring 2015 (Chopey)

7. The future of cataloging/Future roles for catalogers/Changing roles of catalogers
8. The future of MARC format
