

Second Exam – Paper portion – 50 points – Due Thursday 10/12/06

Write a short 3-5 page paper. Discuss one or more of the questions all of you generated from homework03, homework04 and homework05. Each question selected must have at least one journal article referenced and integrated in the discussion of the question. Attach a copy of the article(s).

Grading Criteria

Adapted from http://www.cof.orst.edu/cof/teach/fs453/term_paper_grading.htm

Well researched - Key information in the scientific literature has been researched and included in the paper drawn from a peer-reviewed technical journal article. No web articles.

Well organized - The information gathered in your research is used appropriately and logically. The primary points are organized in a logical manner, and lead in a thoughtful way to development of your central thesis and conclusions.

Grammatically correct and without spelling errors - With all of the resources available in the University, there is little excuse for errors in grammar and spelling.

Well formatted - The paper uses consistent and appropriate citation formats, and meets the format requirements assigned.

Highest quality are well researched, well organized, grammatically correct without spelling errors, well formatted, and well presented.
