

ICS 499 – 1 Credit – Research into Computer Software Developments in Robotics

	Sit in on a robotics related class if have not taken it. Weekly reports of the computer software developments in robotics reviewed.
1	Discuss research direction
2	
3	
4	First private presentation of results and discussion (1 hour)
5	
6	
7	
8	Second private presentation of results and discussion (1 hour)
9	
10	
11	
12	Third private presentation of results and discussion (1 hour)
13	
14	
15	20 minute presentation in ICS 463 on Computer Software Developments in Robotics or a specific report of a specialty area. Presentation to be posted to class website and may be used in future classes.
16	

Initial Projects

1. Review of robotics developments in academic (journals) and technical literature (patents).
2. Review a specialty areas in robotics related to computer science (e.g., swarm intelligence, machine vision, sensory fusion)
