Course description

Exploration of relationships between disciplines in social sciences, science and technology, and humanities. Professional development topics. Faculty and student presentations.

This seminar covers the following Student Learning Outcomes of the CIS PhD program:

- SLO2: Synthesize diverse data, theories and methods
- SLO5: Develop and articulate a professional identity as a contributing member of a research community

To receive credit for the course, you must:

- attend at least 10 of the 15 sessions
- be physically present for at least 5 sessions
- complete all assigned work.

To receive credit for attendance, use the sign in sheet circulated in class, login via Halawai during the session, or view the Halawai recording if available, and post your reaction on the corresponding Laulima discussion thread prior to the following week’s talk. Exceptions to the attendance policy must be approved in advance. When available, slides and other handouts will be archived in the Laulima Resources section.
