MENTORING PROGRAM

Fall 2003
FSHE 110
Narrative Description Pre-Mentoring

Technology: Enhanced
Instructor: Frank Leake
Course: FSHE 110 Fundamentals of Cookery

Student Population:
• 16 students per class
• Computer access available in class
• Computer lab access available on-camp

Course Description:
FSHE 110 focuses on fundamental concepts, skills and techniques of cookery. Includes the study of culinary terms and ingredients; cooking theories and procedures for making stocks, soups, and sauces; basic cooking methods; handling and preparation techniques for fruits, vegetables, and starches; proper use of recipes, tools, and equipment with special emphasis on knife handling skills.

Current Faculty Technology Modeling:
• Communicate with students via email
• Use a word processor to write recipes and descriptions

Current Student Technology Use:
Students communicate with the instructor via email.

Technology Goal Through Mentoring:
A website will be developed as an orientation to the course. All students are currently required to attend a face-to-face orientation prior to enrolling and the first day of instruction.

Future Needs:
• Learn to provide course supplement materials in WebCT
• Learn to use email within WebCT to communicate the students
• Learn to use discussion board in WebCT to promote critical thinking through assignments
• Learn to use a video camera
• Learn to use an online video editor (iMovie)
• Learn to add video files to website
• Learn to use a digital still camera
• Learn to use a graphic editing software (Photoshop)
