

Consider the following transactions:

T1: R(A),W(A),R(B),W(B) **T2:** R(B),W(B),R(C),W(C) **T3:** R(A),W(A),R(C),W(C)

1. Give a serializable schedule for T1, T2, & T3.
2. Give a conflict serializable schedule for T1, T2, & T3.
3. Draw the dependency graph for your conflict serializable schedule from (3).
4. Give a schedule that is not conflict serializable.
5. Draw the dependency graph for your schedule from (4).
