2. My overall evaluation of this course is...
Excellent
Very challenging, but also very useful for applying what we're learning to real life situations.
Good
Good
Extremely difficult but extremely rewarding to see I was able to apply the class material to a real world scenario.
I found this course very difficult, but also very rewarding in terms of my understanding of infosec. While I wish the homework counted for points instead of just participation, I understand the reasoning for doing so. The final exam was particularly tough but we were given all the means to succeed on it. I would recommend this course as taught by Phil Robbins without reservations.

3. If this course was taken to fulfill course requirements for your concentration/major, how did this course enhance your personal and/or professional development in your concentration/major?
It brought my attention to CISSP and how important it is.
This course provided insight into what it's like after college when applying for a job and taking the CISSP exam.
It helped me gain information on cybersecurity and management aspects of it.
Yes, I think this taught the fundamentals of the field regardless if I was going to be come a ISSM or not.
It help me gain confident answering security related questions.
This course has inspired me to evaluate and address my knowledge gaps, as well as seek out new learning/training opportunities.

4. I would rate the overall effectiveness of the instructor: F=Inferior; D=Poor; C=Average; B=Good; A=Superior.									
	Mean	N-Size	Std Dev		F	D	C	B	A

6. Please comment on the activities or resources that could be added to this course to improve your learning.

None. Philip gave us all resources needed to succeed in the class.

More time during lectures. It's unfortunate that there isn't enough time to go over the large amount of material.

I guess it would be nice to have like small scenarios as assignments as well to help build the foundation for thinking more into the scenarios that we go through in the exams.

17. Please list your suggestions for improving the course and/or the instructor's teaching style and methods.									
None									
More discussion into examples such as exams taken in the past.									
Graded assignments are needed besides a midterm and final. I want tests not 200 questions of ungraded assignments. More interaction. Also there was alot of material covered and no time for questions. There wasnt a single time that we were asked if we had questions.									
N/A									

18. My overall evaluation of this instructor is....									
Excellent. This was an extremely hard class, but Philip is a good instructor. All his resources are available online to study.									
Very practical and does well to help prepare us for what people ask or look for when applying for a job in this field, as well as what to expect when taking the CISSP exam.									
Professor really knows his stuff.									
Good									
Great teacher. Super interesting and helpful.									
Phil has expert knowledge of the course material and brings an amazing wealth of work experience in the field of cybersecurity, esp in the DoD space. He explains things thoroughly and clearly, with a seamless way of tying things back to the main thread. Even when his lectures went a bit longer than scheduled, I never felt like the extra time was unwarranted and enjoyed the additional explanation.									

19. Class assignments provided an effective aid for learning the subject matter.
