# Vegetable Crops Update

**Volume 3**  
**January 1993**  
**No. 1**

FOR UNIVERSITY OF HAWAII VEGETABLE COUNTY EXTENSION AGENTS

| Department of Horticulture  
| 3190 Maile Way  
| Honolulu, HI 96822 |

## Index of Contents for Volumes 1 and 2 (1991 and 1992)

### May 1991 Vol. 1 No. 1

1.0. Resources  
1.1. Vegetable Production Training Manual  
1.2. American Journal of Alternative Agriculture  
1.3. 1991 Organic Supplier Directory

2.0. Upcoming Events

3.0. Research News  
3.1. Cultivar Releases: Tomato; Soybean; Day neutral Strawberries  
3.2. Bed spacing for strawberries  
3.3. Uniform plant stands to promote early growth, may provide an early competitive advantage to compete against weeds, and outgrow pest damage

### June 1991 Vol. 1 No. 2

1.0. Research News  
1.1. Effect of cultural practices on plant, pests and diseases  
1.2. Crop rotation and monoculture affect the soil "receptivity" to take-all  
1.3. Effect of crop rotation with sorghum to control cyst and root-knot nematodes in soybean  
1.4. The use of Antitranspirants to increase yields in transplanted bell peppers  
1.5. New asparagus breeding line

2.0. News Updates  
2.1. Industry Associations in the mainland: Asparagus and Onions  
2.2. Sweetpotato white flies in Florida tomatoes  
2.3. Increase in air-shipment of specialty products  
2.4. Herbs in the News  
3.0. Upcoming Events

### July 1991 Vol. 1. No. 3

1.0. Research and Industry News  
1.1. Produce quality in Supermarket  
1.2. Vesicular-Arbuscular Mycorrhiza (VAM) helps control Pythium in greenhouse cucumbers  
1.3. Effect of crop rotation with sorghum to control cyst and root-knot nematodes in soybean  
1.4. Drip Irrigation in California  
1.5. Thrips control update from Florida  
1.6. Watermelon Nutrition Tips  
1.7. Hydroponics Production Tips  
1.8. Florida Cultivar Trials; Spinach and Broccoli

2.0. Upcoming Events

3.0. Resources

### September 1991 Vol. 1. No. 4

1.0. Research and Industry News  
1.1. Organic Stores Target Upscale Markets  
1.2. Hydroponics in Illinois  
1.3. Fresh Produce Promotion Campaigns in Mainland  
1.4. Women in Agriculture  
1.5. Smaller Packs demanded by Food Service Industry  
1.6. New Alternative Pest Controls  
1.8. No-till results in reduction of Nitrogen leaching

2.0. Upcoming Events
November 1991 Vol 1. No. 5.

1.0 Research and Industry News
1.1 Terminator II: Poinsetta Whitefly Hits California, Texas
1.2 Whitefly Chemical Control in greenhouse Tomatoes
1.3 PetoSeed to Evaluate TSWV Resistant Lines
1.4 Convention Fever Trivia
1.5 Manure Treatment Efficiency Affected by Soil Type
1.6 Pesticide Registration - Cal-EPA
1.7 Veggies and Health Pointers
1.8 Opportunities for Direct Marketing to Restaurants
1.9 Costs of Organics vs. Conventional Production
1.10 Nitrogen in Onion
1.11 Environmental Facts About Conventional Agriculture

2.0 Resources Available
3.0 Upcoming Events

January 1992 Vol. 2. No. 1

1.0 Research and Industry News
1.1 Sweetpotato whitefly control with detergents
1.2 SPW Control Strategies
1.3 Other SPW factoids
1.4 Tolerance in Pepper to Western Flower Thrips
1.5 Calcium Nutrition and Tipburn in Lettuce
1.6 Greenhouse Tomato Production costs
1.7 Herb Hydroponic Production
1.8 Population Explosion, myth or reality?
1.9 Green manure for root knot nematodes
1.10 Food Irradiation factoids
1.11 Starter fertilizers on bulb onions
1.12 Need for a Statewide Vegetable Crops Association

2.0 Resources

March 1992 Vol. 2. No. 2

1.0 Research and Industry News
1.1 Nitrogen and Plastic Mulch on Greenhouse Lettuce
1.2 Food Service Factoids
1.3 Integrated Management Program for Sweetpotato whitefly and Melon Thrips in

Cucumber, Melon, Tomato, Eggplant and Pepper.
1.4 Vacationing? Visit Farm in England!
1.5 Statistics on organic farm numbers
1.6 Baby corn Production
1.7 Organic Mulch on Drip-Irrigated Tomatoes
1.8 Mushroom Production in North America: Factoids
1.9 Biological control for sweetpotato Weevil

2.0 Horticulture Department News
3.0 Resources
4.0 Upcoming Events

May 1992: Vol. 2 No. 3

1.0 Research and Industry News
1.1 Local Research Highlights: Cucurbits, Tomatoes, Celery
1.2 Decline of the Human Factor
1.3 Golden Snail wreaks havoc in Taro
1.5 Summary Statics for 1990 Hawaii grown Vegetables

2.0 Marketing Corner
2.1 Karen’s Six Produce Marketing laws
2.2 In the Table: Healthy Factoids
2.3 Produce Value Added Alternatives

3.0 Biological Control Corner
3.1 Residue management for nematode control
3.2 Previous work with crop residues

8.0 Upcoming Events
9.0 Resources

July 1992, Vol. 2 No. 4

1.0 Research and Industry News
1.1 Crop Productivity and Biological Diversity
1.2 Nation-wide budget blues: Factoids
1.3 Insect populations in diversified soybean plots
1.4 Neem Tree Highlights
1.5 Research Directives in the continental US
1.5.1 Down South (Veggies) Cultural Aspects
Pests and Diseases
1.5.2 Down West (Asparagus)
Washington State Asparagus Commission, 1992 Research Priorities
Glossary for Vol. 3 No. 1

Allelopathy 3
Antitranspirants 1
asparagus 1, 2
Avocados 3
Baby corn 2
Benlate 3
biological control 3
Botrytis 3
Broccoli 1
Calcium 2
Carrots 3
Caterpillar 3
Celery 2
chili peppers 3
