8. If you answered 'Other' for the question above, please specify.

9. What were the positive and negative aspects of online learning in this class?
Positive: straight forward and everything important was on the slides Negative: Less interactions with students
Missing out on interaction with other students.
The professor does a good job in this course. However, I would recommend refraining from the ink annotations only due to the fact that it is not always eligible at times. However, he is still a good professor.
Easy to attend. Hard to hear lecture sometimes.
The lecture should be recorded because the material can be too dense. When the lecture goes by fast it's hard to keep up with the information, it would be helpful if we could have a lecture video to revisit for review. However, professor Kirs did an excellent job this semester, he provided the students all the resources needed for each exams.
The positive aspect about this is that we are able to keep social distancing from each other to prevent the spread of COVID-19. The negative aspect is that we are not able to get the in-person interaction experience.
