1. Please comment on Lecturer's performance as your instructor.
Instructor was amazing, he was supportive and always tried to help the students and make sure we understood. He answered questions professionally and nicely. He respected his students.
Great instructor and very kind!
Strong accent so a little difficult to understand at times, but provided very clear resources in helping to teach students the material in the course.
The instructor is very thorough throughout lecture and make sùres student understand the topic. It was that the instructor always encourage students to ask questions they had at the end of each lecture.
Very knowledgeable about all forms of information that he presented this semester. he was also very open to comments and questions regarding the material.
My only comment would be to maybe have a watch to look at when performing lectures.

2. Please comment on the quality and value of the COURSE.
I loved the course, it was one of my favorite courses this semester and I learned a lot about our world and what goes on it.
Great overview of various content throughout microbiology with special focus on local impacts, etc.
Good. Class was both decently challenging and very interesting. A little exam heavy though.
The course was very organized even if the we are a little behind lectures. I found the course enjoyable and learn many things from the course. I liked how the instructor tied this topic to Hawaii, which made me be more aware about microbial and environmental concerns and process. At the same time, learn to build a connection with thing I learn in class to the environment around me.
Very interesting course overall, very broad but that was one of its strengths.
I enjoyed the professor and lectures.
